

COSC Team 9 Contract

Ryan Eveson 99775389 | Sami Jaffri 44165611 | Evan Pasenau 36403509 | Jinxi Hu 48528608 | Kevin Zhang 10811057 | Eric Chen 47368527

Team Vision and goals

"We strive to function as a team that will focus on collaboration, problem solving, and learning. We will support one another when they need assistance, and provide helpful criticism when it is needed. We will strive for the best work possible and complete capstone as a well functioning team."

Outline expectations on:

- Meetings:
 - We must ensure that all people attend all meetings and arrive on time
 - If someone can not attend they must inform the team in advance that they can not come and send a description of the work that they have completed to the team discord.
 - If someone begins to skip all meetings or is always late, we will begin to use the resolution strategy that we created
- Communication and collaboration process
 - All members must all contribute when in meeting and inform other team members of what they have completed, and what they are planning to complete in the upcoming week
 - They must bring up any concerns that they have in each meeting
 - If a member is struggling to complete work or is confused the first thing that they should do is ask for assistance from another team member
- Dist and delivery of work
 - The work must be evenly distributed each week.
 - Each team member should hold all other team members accountable for the work that they deliver and the amount of work that they complete
 - If a member is not completing work on time, is not doing enough each week, or submitting poor quality of work, we will use the resolution strategy to solve the problem
 - The quality of work must be maintained by:
 - Reading and understanding all code produced by AI and using existing code when possible, rather than creating redundant code
 - Each section of code must be commented to enable understanding and explain the necessity.
- Statement on commitment to avoid inappropriate behavior
 - There will be no harassment, bullying or excessive arguing
 - Members will try and maintain a professional environment
 - There will be no Academic dishonesty or misconduct
 - Any violations will be handled under the resolution strategy
- Ground rules
 - All major decisions will be made by consensus whenever possible.
 - If consensus is not possible, the team will vote, and majority rules.
 - Team members must maintain confidentiality for internal issues.
- Resolution strategy and steps to take before firing

COSC Team 9 Contract

Ryan Eveson 99775389 | Sami Jaffri 44165611 | Evan Pasenau 36403509 | Jinxi Hu 48528608 | Kevin Zhang 10811057 | Eric Chen 47368527

- When something goes wrong the first time:
 - A teammate will record the issue in a new file in the logs file in the team logs branch
 - The incident will be dated and described in detail
 - Expectation of change:
 - Will include a clear expectation of the problem and what must change
 - Have 1 week to improve performance
 - Include agreement from the teammate affected
 - The whole process will involve at least 1 additional teammate to do the documentation from the teammate offending and the teammate affected
- When something goes wrong repeatedly:
 - Each repeated issue is documented, including dates and details.
 - Who documents it: The affected teammate or the meeting facilitating teammate
 - Each additional documentation must include the expected change and timeframe to implement it.
- The team will consider firing a teammate if:
 - The issue persists after two documented warnings
 - The behavior severely harms team progress
 - The teammate refuses to cooperate or communicate
 - The teammate repeatedly misses deadlines or disappears without communication
 - The team will notify the instructor or TA before executing the firing clause.
